(54) PROJECTOR DEVICE AND LIGHTING DEVICE FOR PHOTOGRAPHING

(57)Abstract:

PURPOSE: To select several light sources which differ in rated light quantity and power consumption according to circumstances.

CONSTITUTION: The projector device 1 has a back light part 2 which is rotatable about a base part 4 and a main body part 3 which is coupled detachably with the base part 4. Two electric bulbs 6 and 7 are provided in the back light part 2; and one electric bulb 6 illuminates with a battery voltage and the other electric bulb 7 illuminates by an AC power source. In the projector device 1, the back light part 2 is rotated about the base part 4 to selectively use one of the electric bulbs. Further, the main body part 3 including lens systems 47, 48, and 50 and a liquid crystal display part 49 is detached from the base part 4 and the back light part 2 is usable as a video light.
